The EUROSUN® Easy and Front-Mounting blinds can be quickly and easily installed, because the Venetian blinds shutter bundle is already built into the panel or the box in our factory.

**EUROSUN® Easy and Front-Mounting blinds**

Sophisticated technology and quality at the highest level. Both systems are easy to assemble. The base rails, which only need to be fastened to the building, are the bearing element. All the other components are just attached or screwed on.

**EUROSUN® Easy blinds**

The EUROSUN Easy blinds have individually angled panels that covers the bundle of slats.

A variety of slot shapes and sizes can be built into both systems, which can be operated by motor or with a crank handle. With motor operation, both systems can also have additional insect protection blinds. Function, performance and design are easy to achieve with the EUROSUN sun protection system.

**EUROSUN® Front-Mounting blinds**

The EUROSUN® front-mounting blind has a casing in the form of an extruded aluminium box that is identical to the blind housing.

A variety of slot shapes and sizes can be built into both systems, which can be operated by motor or with a crank handle. With motor operation, both systems can also have additional insect protection blinds. Function, performance and design are easy to achieve with the EUROSUN® sun protection system.
